Seabridge TFX

Company Overview

POWERED BY

REFINITIV®

Seabridge TFX is a big data empowered trade and supply chain finance solutions provider. We believe that the future of finance is increasingly participative and decentralized. The traditionally complex bank financing models are being disrupted by the emerging enterprises powered by fintech and trade tech.

In close partnership with Refinitiv, a global provider of financial market data and infrastructure, Seabridge has created a digital financing marketplace. This is powered by Seabridge's proprietary supply chain financing platform which incorporates best-in-class processes & technologies.

Seabridge platform empowers all stakeholders: buyers, sellers, and funders. Our platform and solutions benefit buyers by allowing them to optimize their working capital. Sellers can benefit through access to on-demand financing through Seabridge's pool of funders which includes banks and non-banks such as family offices, hedge funds, corporate treasury, specialised funds, and other institutional investors.

Funders can leverage opportunities to flexibly invest their funds on trade finance assets that yield better risk-adjusted financial returns and achieve greater investment diversification.

Our core trade and supply chain financing platform

How are we different?

- State of the art technology and scalable platform
- Access to global funders via Refinitiv Eikon digital financing marketplace
- Access and integrated to Refinitiv's comprehensive suite of risk and financial data solutions, such as Worldcheck for KYC/AML screening, Qual-ID for identity verification, PERMID for data/entity tracking, Starmine for credit risk modeling and Eikon platform for trading, data and analytics
- Simplified onboarding and eKYC processes
- Flexible, customizable, and intuitive platform
- Multi-currency capability
- Straight through processing
- Syndication, Multi-stage funding and ability to create primary / secondary notes

Everyone benefits

Seabridge platform empowers all stakeholders: buyers, sellers, and funders.

- Buyers benefit by optimizing working capital.
- Sellers benefit through access to on-demand financing.
- Funders benefit by participating in syndicated deals & risk adjusted opportunities.

Buyer

Our platform and solutions benefit buyers by allowing them to optimize their working capital.

Seller

Sellers can benefit through access to on-demand financing through Seabridge's pool of funders.

Funder

Funders get access to attractive risk - adjusted yield and fund syndication opportunities that are pre vetted.

Buyer-Led Financing Solution

Our buyer-led financing solution targets larger corporates with a significant supplier base. With this solution, we provide features such as a combination of dynamic discounting and reverse factoring. It also allows for participative funding through a self-service portal. This gives corporates an opportunity to make their money work for them and drive up profitability by availing better deals from suppliers. Suppliers benefit from getting quick access to capital to better manage their operations and invest in business growth without being at the mercy of invoice clearance cycles. Funders can participate in syndicated deals with the risk being shifted from sellers to the anchor buyer.

MSME Cluster Financing Solution

MSME Cluster financing is a financing solution that provides funding to businesses along with different points in the service life cycle, and not just when final invoices are approved. The straight-through-processing digital platform is specifically designed to serve large service industry clusters that are in the process of adopting digital processes like e-invoicing, paperless claims, and e-payments.

Structured Commodity Financing Solution

As banks pull back from traditional trade finance, our Structured Commodity financing solution hosted on Refinitiv Eikon provides a syndicated platform that will enable a participative funding model for commodity trade financing. The platform brings together a variety of funders, buyers, and commodity traders. Funders benefit from the structured approach, detailed real-time information and visibility, and the ability to spread their risk. The platform also offers key features such as analytics, risk evaluation, insurance coverage, etc. to make the entire process as seamless and hassle-free as possible for all parties. With up-to-date information on credit scores, feeds from Refinitiv World-Check and Starmine, vessel and port information inbuilt into the system, funders get a single dashboard view of the commodity trade and the risks associated with it.

Our Global Funding Network

Seabridge, in partnership with Refinitiv has created a digital financing marketplace solution on the global Refinitiv Eikon platform for funders to access funding opportunities on trade and supply chain financing assets. This marketplace is powered by our Seabridge platform.

Refinitiv has more than 400,000 global users on their Eikon platform. This provides Seabridge buyers and sellers the global reach to a comprehensive group of eligible funders to participate in the financing of all the trade finance transactions on the Seabridge platform.
